Nutrition, Ecology and Nutritional Ecology: Toward an Ecology Needs an Identity More Distinct Than a Diffuse Confluence of Methods and Interests United Within the General Areas of Nutrition and Ecology. What would be the cornerstone of that identity? In our judgment, the single most distinctive characteristic of ecology is its interdisciplinary nature. Ecology is the study of the interactions between organisms and their environment. It is a science that seeks to understand the complex relationships between living organisms and the physical and chemical factors that influence their survival and reproduction. Ecology is a dynamic and ever-evolving field that continues to expand our understanding of the natural world.
